A close-up, high-angle photograph of a dense field of seaweed, likely Seagreens, growing in shallow water. The seaweed consists of numerous thin, dark green blades with lighter green or yellowish tips. A small crab is visible in the upper center of the frame, partially obscured by the seaweed. The water is a clear, light blue color, and the overall scene is brightly lit, suggesting a sunny day.

Seagreens®

Don't do it for the taste, do it for the nutrition...
